

Reference: RUD-031

Name: TUBE BENDING MACHINE

Year: .

Brand: TEJERO

Width: .

Description: Tube bending machine, for steel tubes up to Ø32x1.5 mm.

Maximum internal bend radius: 150 mm.

Useful length of the machine: 2,500 mm.

Regulation and sequential selection of six angles. Bending speed. 14 r.p.m.

3Cv 220 / 380V three-phase asynchronous brake motor. Rotating machine head to facilitate periodic adjustment of the engine brake.

Automatic locking and unlocking of the tube. Automatic return of the bending arm.

Weight: 350kg approx
